

Assignment Instructions:

Creation of Your Digital Library

Using open-source digital library software, build a digital library that includes:

1. Metadata Application - Assign metadata to at least 5 items (e.g, Dublin Core, MARC, MODS, or customized schema depending on the platform).

2. Core Principles of User Interface (UI) Design - Apply at least three principles, such as:

- Ease of use
- Interactive efficiency
- Consistency in navigation
- Error tolerance
- User satisfaction

(Be ready to show how your chosen principles were applied.)

3. Search and Browse Functionality - Ensure users can retrieve information easily.

Your digital library must be uploaded to your Moodle classroom
